Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2833

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over the prior art figs. 3-4 in view of Kawai et al.

The claims are considered to be met by the prior art figs 3-4 except that the prior art does not show a cover piece which arranges on the first side of the glass stopper for surrounding one pin and being connected with the metal sleeve. Kawai, figs. 1-4 and 9-10 show a cover piece 23 arranged on one side of a conductive shell 6 for surrounding one pin 9 and being connected with the conductive shell via a contact portion 24. It would have been obvious to one with skill in the art to modify the connector of the prior art by providing the glass stopper with a cover piece with the features as described above, as taught by Kawai, in order to ground the pin connector.

As to claim 2, Kawai, fig 3 shows a recess 23 on first side of the connector. It would have been obvious to one with skill in the art to provide a recess on the first side of the glass stopper of the prior art figs. 3-4, as taught by Kawai, in order to provide positive fitting of the cover on the glass stopper.

3. Applicant's arguments with respect to claims 1-2 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 2833

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

5. Hackman, Baur et al, Gallusser et al and Chen et al are cited for disclosure of a single cover means.

6. Any inquiry concerning this communication should be directed to Hien Vu at telephone number (703) 308-2009.
